SUMMARY

I am a passionate Backend Developer Intern with a growing interest in building secure and scalable web applications using Node.js, Express, PostgreSQL, and MongoDB. I am currently developing projects while strengthening my understanding of backend development, RESTful API development, version control systems, and distributed systems concepts. Additionally, I am building a strong foundation in Python and exploring machine learning concepts to broaden my technical skill set.

SKILLS

- **Frontend:** HTML, CSS, JavaScript
- **Backend:** Node.js, Express, Flask, Python, SQLite, PostgreSQL, MongoDB
- **APIs:** RESTful APIs, AI API integrations (basic)
- **Other:** Git, UI/UX considerations

PROJECTS

Bus Reservation System

- Designed and developed an admin dashboard for managing users, buses, and revenue tracking using HTML, CSS, JavaScript, and PHP.
- Implemented role-based access control and enabled secure ticket download functionality for clients.

Hotel Cancellation Prediction System

- Developed a hotel booking platform using Python and Flask, enabling users to reserve rooms with both online and offline booking options.
- Integrated a Random Forest-based machine learning model to predict booking cancellations and assist admin-side decision-making.

Chatbot

- Built a real-time AI chat application with temporary room codes using Node.js, Express, Socket.IO, and the Gemini API.

Race Track Rental Website

- Designed the UI/UX of a race track rental website using Figma, focusing on user-friendly booking and navigation flow.

EDUCATION

Bachelor in Computer Application

(2022 – Present)

National College of Computer Studies, Kathmandu

EXTRACURRICULAR ACTIVITIES

Participated in a Business Hackathon and worked in a team to design and develop a mobile application for text-to-speech translation aimed at improving accessibility for low-literacy users.
